

INTERIORS DIVISION

Spaces designed to be *remembered.*

Turnkey interior design and fit-out for luxury homes,
corporate offices, and healthcare facilities — conceived,
built, and delivered as a single, seamless engagement.

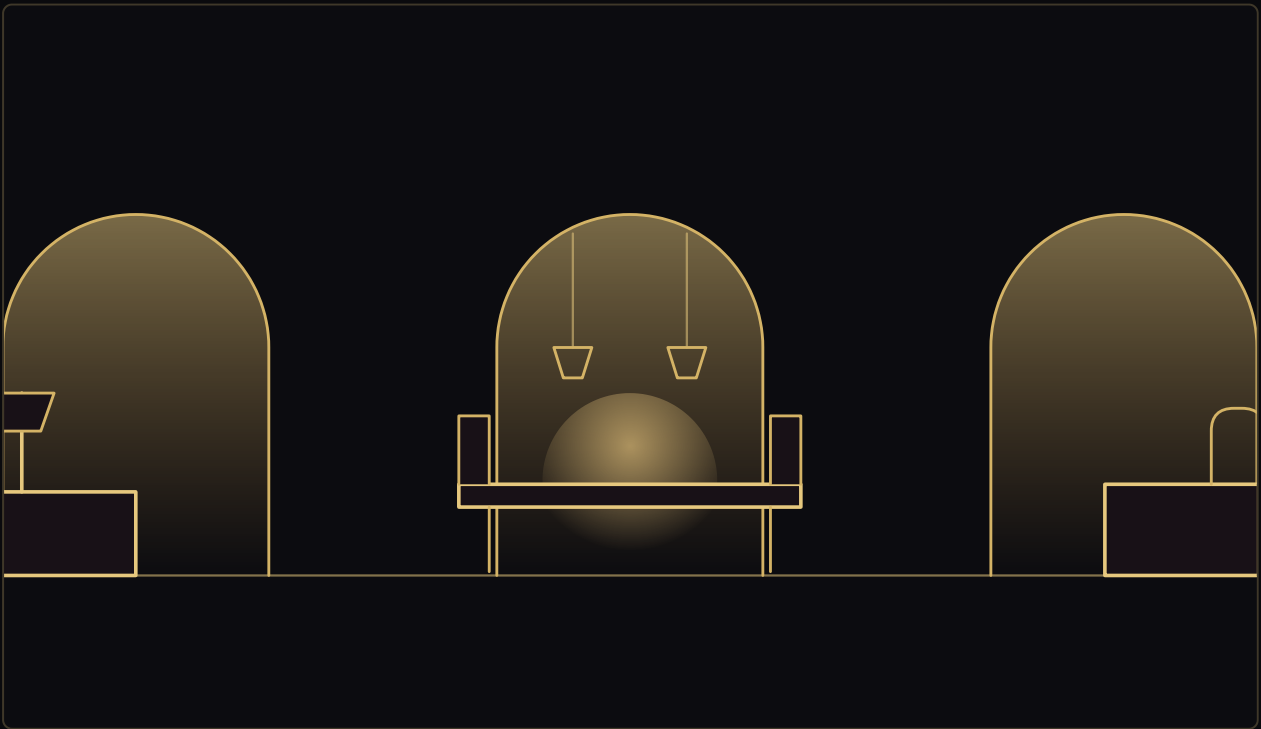

Design · Build · Furnish

www.varadanexus.com

One team, from blueprint to *handover*.

Our Interiors division designs and executes complete spaces under one roof — architecture-led planning, bespoke joinery, curated materials, lighting, and furnishing. You work with a single accountable partner from the first sketch to the final walkthrough, with no handoffs between designer and contractor. The space you are shown is the space you receive.

Four worlds, *one standard.*

Residential & Luxury

Villas, penthouses, and apartments finished to a bespoke standard — custom joinery, curated materials, and lighting designed around how you live.

Commercial & Office

Workplaces, showrooms, retail, and hospitality that reflect your brand and work hard — planning that balances presence with productivity.

Hospital & Healthcare

Clinical fit-outs built to standard — patient rooms, consultation suites, and theatres designed for hygiene, workflow, and calm.

Turnkey & Full-Service

Design, execution, and furnishing delivered end to end — a single contract, a single point of accountability, and a move-in-ready space.

What we *deliver*.

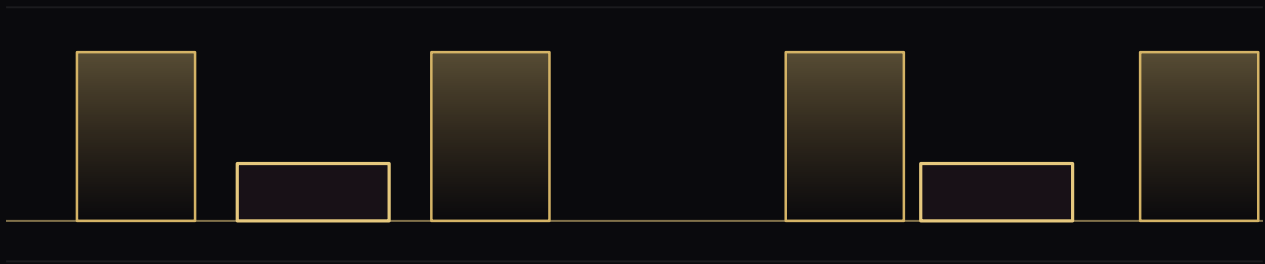

01 Concept & Space Planning Layouts, zoning, and 3D concepts tailored to how the space will be used.	02 Bespoke Joinery Custom furniture, wardrobes, and millwork built to measure.
03 Materials & Finishes Curated palettes of stone, wood, textile, and metal.	04 Lighting Design Layered, mood-driven lighting engineered into every room.
05 Execution & Project Management Contractors, timelines, and quality control managed for you.	06 Furnishing & Styling Final styling, art, and décor for a complete handover.

How we work

1 Discovery Understanding your brief, site, and budget.	2 Design Concepts, 3D visuals, materials, and costing.	3 Build Execution, joinery, and on-site management.	4 Handover Styling, snagging, move-in-ready delivery.
---	--	---	---

Design that is also *engineered*.

*“Interiors sit inside a group that builds and operates real infrastructure — so our specifications **hold**, our timelines are **met**, and our finishes **last**.”*

One Partner, Full Accountability

No handoffs between designer and contractor. We own the outcome end to end — the space you were shown is the space you receive.

Engineering Discipline

The rigour of a group that runs hospitals and logistics, applied to every drawing, material spec, and site review.

Curated, Not Catalogued

Every palette is composed for the project — bespoke joinery and considered materials over off-the-shelf packages.

Delivered Move-In Ready

Styling, snagging, and furnishing included, so handover means walking into a finished, functioning space.

INTERIORS DIVISION

Let's design your *next space.*

Tell us about your home, office, or facility — and we'll take it from
concept to completion.
